

*José Sebastián De los Santos Hernández.*

**Código de Python.**

```
menu.py
1  from flask import Flask, render_templates
2
3  app = Flask(__name__)
4
5
6  @app.route("/")
7  def port_web():
8      return render_templates("portafolioweb.html")
9
10
11 if __name__ == "__main__":
12     app.run()
```

**Nota:** Por alguna razón que desconozco no se corría el archivo y me marcaba import error.

```
(env) C:\Users\sebas\Documents\flask_app>flask run
* Serving Flask app 'menu.py' (lazy loading)
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: off
Usage: flask run [OPTIONS]
Try 'flask run --help' for help.

Error: While importing 'menu', an ImportError was raised.
```
